Your calibration kit has been designed to withstand a moderate amount of physical stress. However, to retain its high precision performance you should treat it with care and prevent any mechanical shock.
It can be damaged if excessive force is applied to the connectors. Such a damage is considered as an abuse of the cal kit and will void the warranty when verified by our service professionals. When the kit is not in use, mount protective caps on the connectors such as the ones which came with the kit.
Store the kit in a shock-resistant environment.
Tighten 3.5 mm connectors with a torque wrench. Torque: 8 lb-inch (90 N-cm)
