### Description

The LM202802-L-C-300 Surface Mount Silicon PIN Diode Limiter is manufactured using Aeroflex / Metelics proven hybrid manufacturing process incorporating PIN Diodes and passive devices integrated within a ceramic substrate. This low profile, compact, surface mount component, (8mm L x 5mm W x 2.5 mm H) offers superior low and high signal performance to comparable MMIC devices in QFN packages. The Limiter Modules are designed to optimize small signal insertion loss, (N.F.) and high signal flat leakage performance in a compact, surface mount package from 2-8 GHz.

Using PIN Diodes with lower thermal resistance ( $< 100$  °C/W), RF C.W. incident power levels of +36 dBm and RF peak incident power levels of +50 dBm @ 1  $\mu$ S RF pulse width, 0.1% duty cycle are very achievable. In addition, this design concept provides lower flat leakage power ( $< +19$  dBm) and lower spike leakage energy ( $< 0.2$  Ergs) for superior LNA protection.

### Applications

This LM202802-L-C-300 Limiters are ideal for octave band Radar applications, requiring high volume, surface mount, solder re-flow manufacturing. These products are durable, reliable, and capable of meeting all military, commercial, and industrial environments. The devices are fully RoHS compliant and are available in tube or tape-reel.

### Environmental Capabilities

The LM202802-L-C-300 Limiters are capable of meeting the environmental requirements of MIL-STD-750 and MIL-STD-202.

### ESD and Moisture Sensitivity Level Rating

PIN Diode Limiters are susceptible to ESD conditions as with all semiconductors. The ESD rating for this device is Class 0, HBM. The moisture sensitivity level rating for this device is MSL 2.
