

# Xinger®

## Ultra Low Profile 0805 Power Divider 75Ω to 75Ω

### Description

The PD0409J7575S2HF is a low profile, sub-miniature Wilkinson power divider in an easy to use surface mount package. The PD0409J7575S2HF is ideal for high volume manufacturing and delivers higher performances than traditional printed and lumped element solutions. The PD0409J7575S2HF is matched to 75 Ω and has a height profile of 0.5 mm which is ideal for high level integrations in the following markets: GSM, WCDMA, DVB-H (Europe) and Terrestrial TV. The PD0409J7575S2HF does not include the resistive element and therefore, requires an external resistor for operation. The PD0409J7575S2HF is available on tape and reel for high volume manufacturing pick and place.

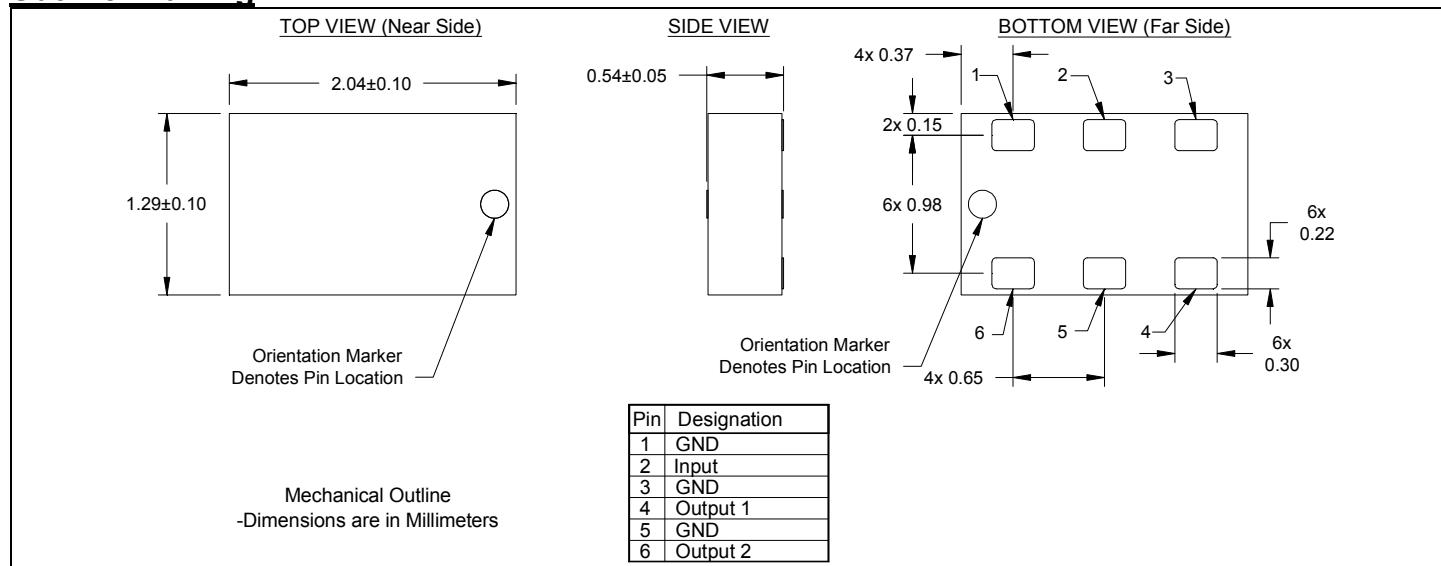

### Detailed Electrical Specifications:

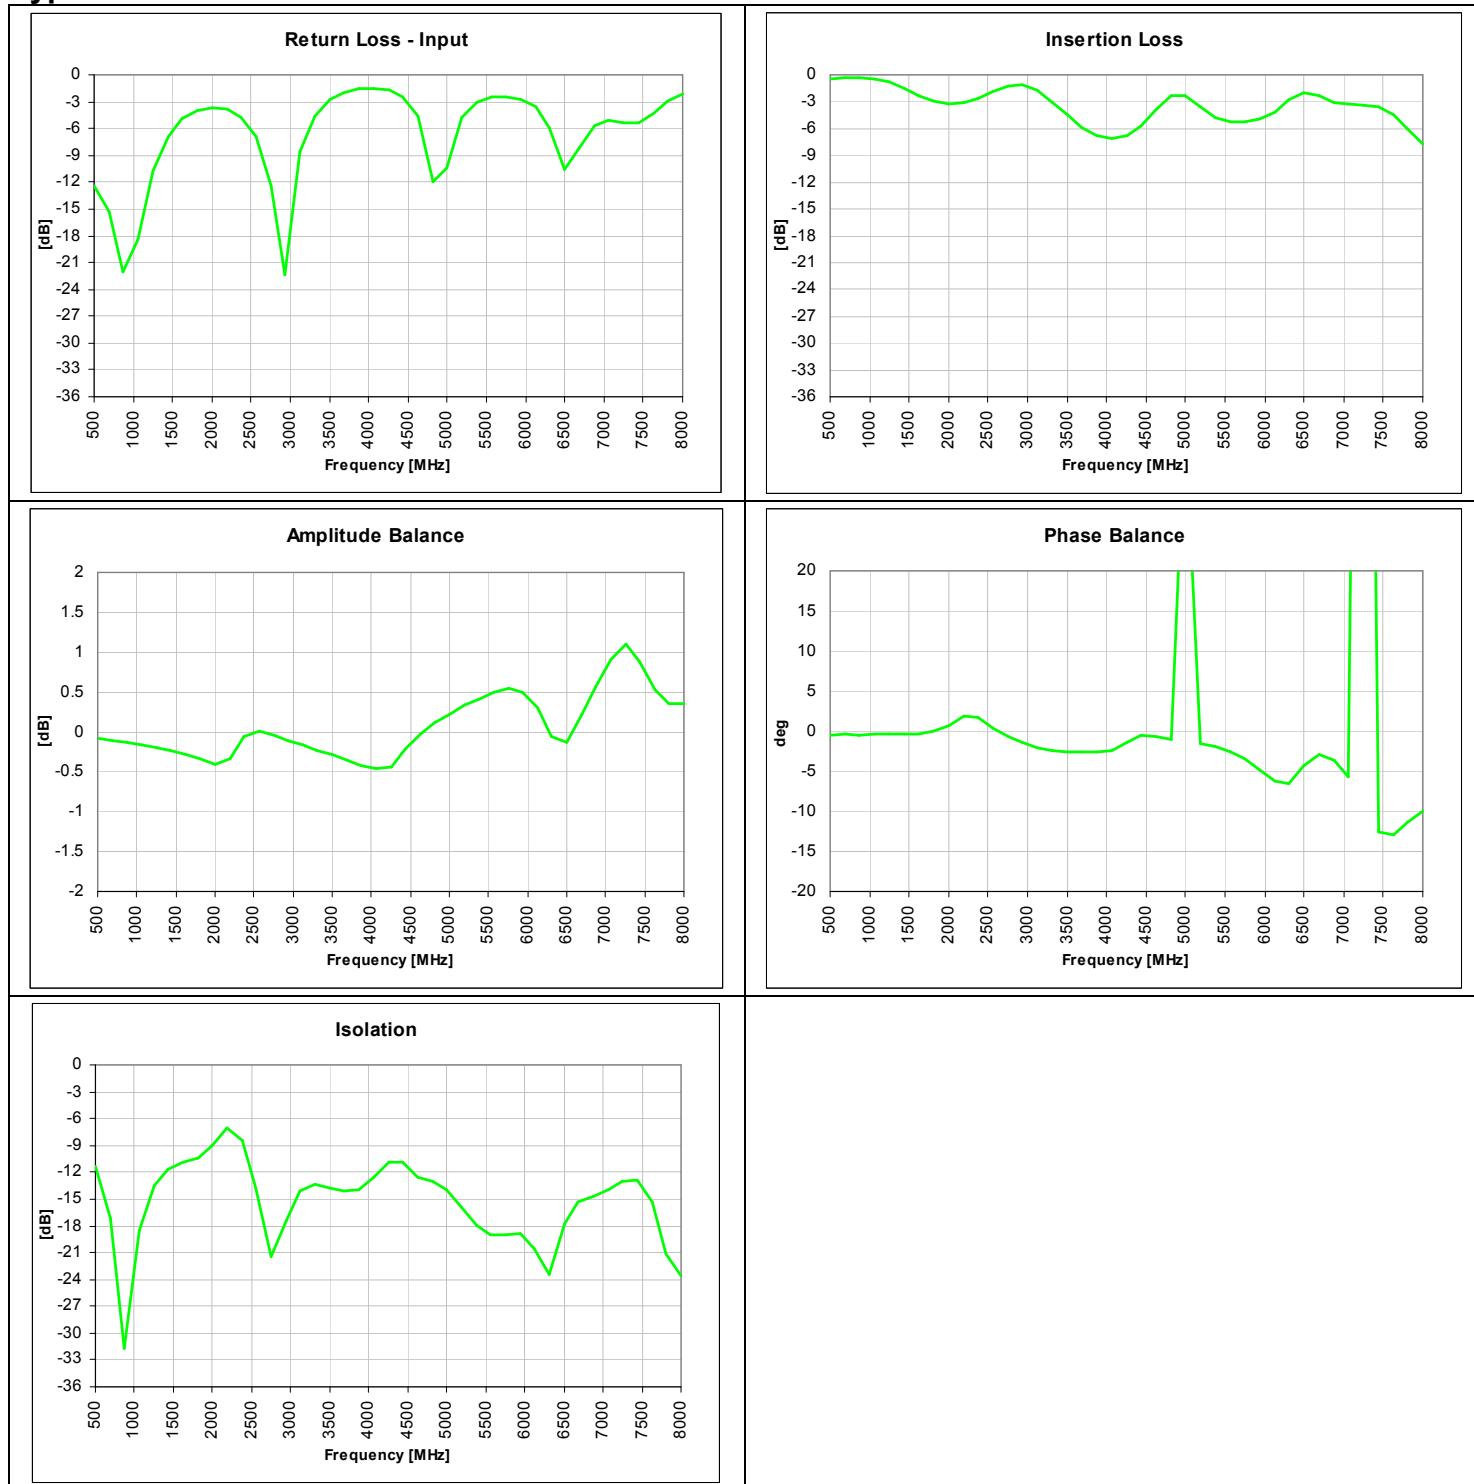

Specifications subject to change without notice.

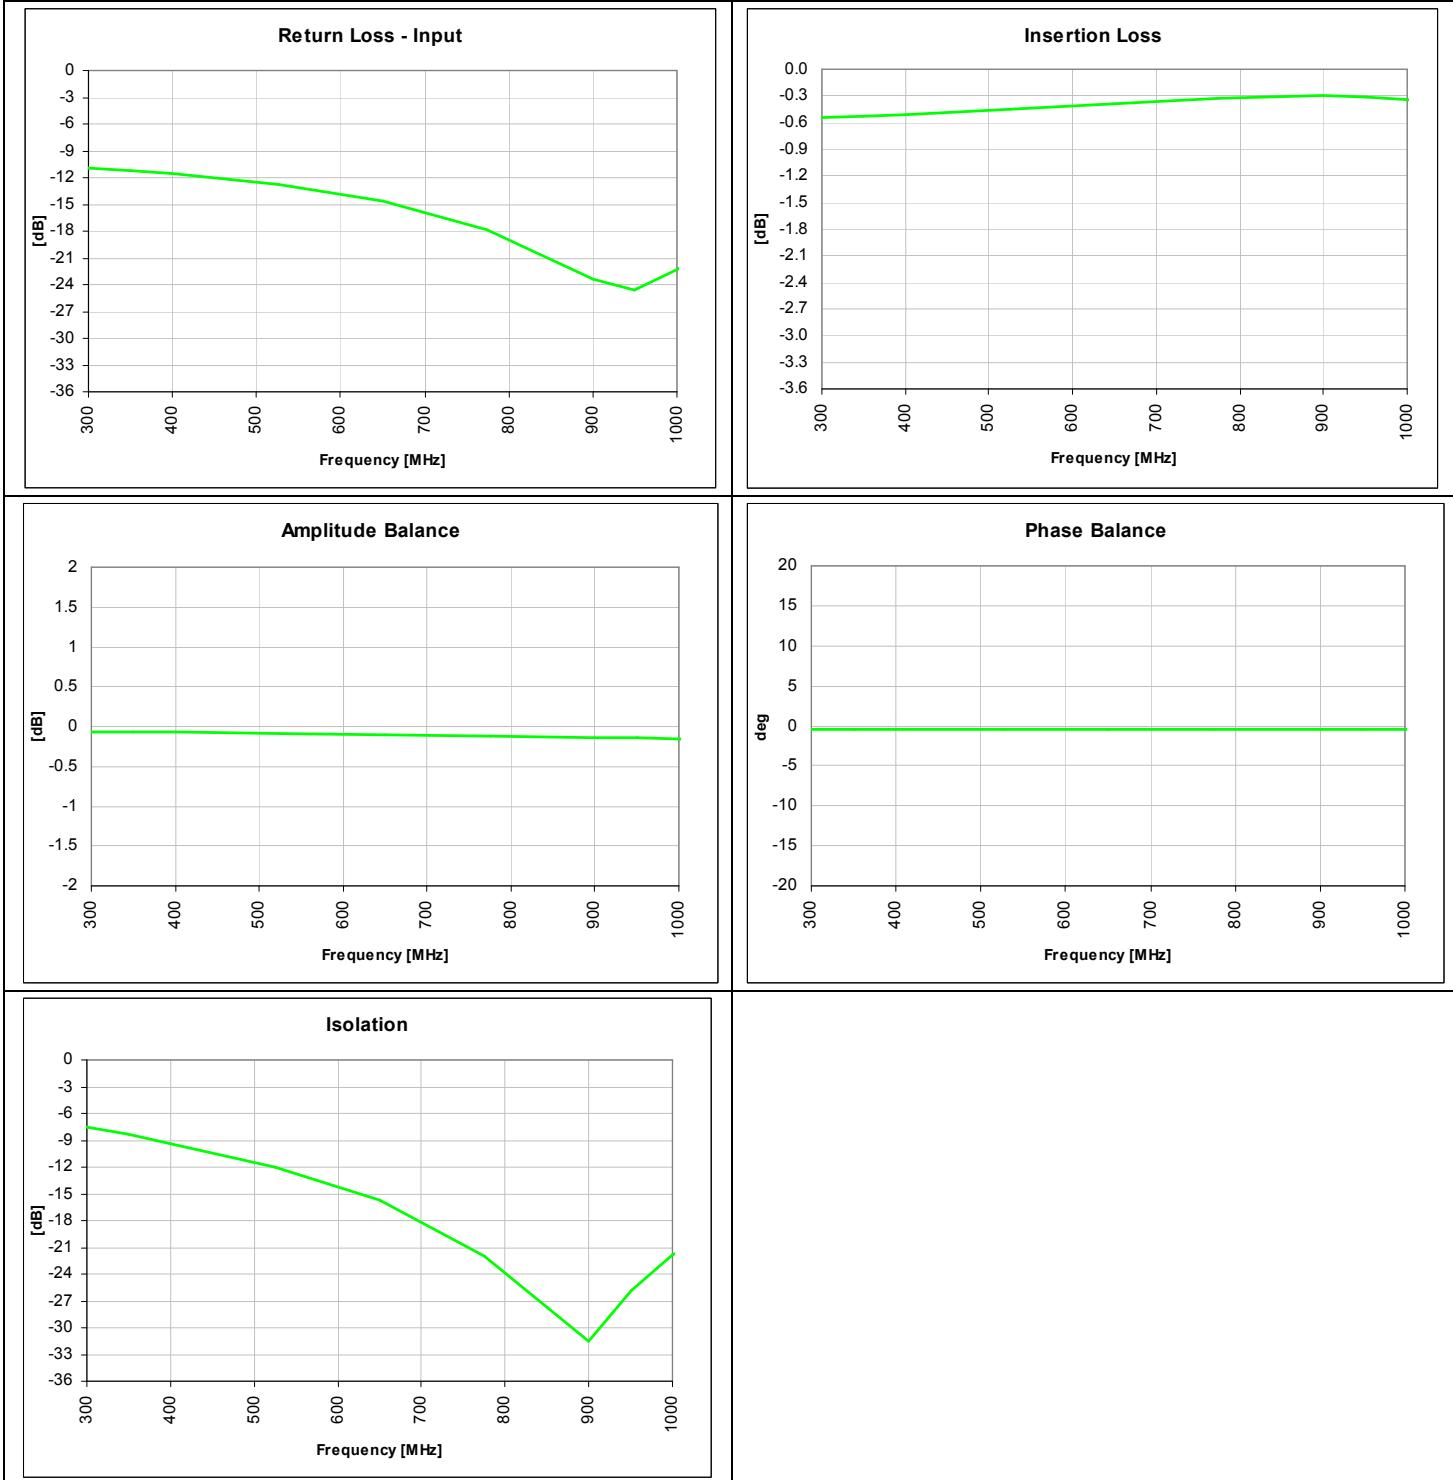

Features:	Parameter	ROOM (25°C)			
		Min.	Typ.	Max	Unit
• 400-900 MHz	Frequency	400		900	MHz
• 9.3 dB Isolation (output ports)	Input Port Impedance		75		Ω
• Good Return Loss	Output Port Impedance		75		Ω
• 0.5mm Height Profile	Return Loss	10	12		dB
• 75Ω Input / 75Ω Outputs	Insertion Loss*		0.5	0.6	dB
• Low Insertion Loss	Amplitude Balance		0.1	0.6	dB
• Surface Mountable	Phase Balance		1	3	Degrees
• Tape & Reel	Isolation (Output Ports)	8.2	9.3		dB
• Non-conductive Surface	Power Handling			2	Watts
• RoHS Compliant	Operating Temperature	-55		+85	°C
• External Resistor Required					
• Halogen Free					

\* Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at +85 °C)

### Outline Drawing

**Typical Broadband Performance: 500 MHz. to 8.0 GHz.**

**Typical Performance: 300 MHz. to 1000 MHz.**

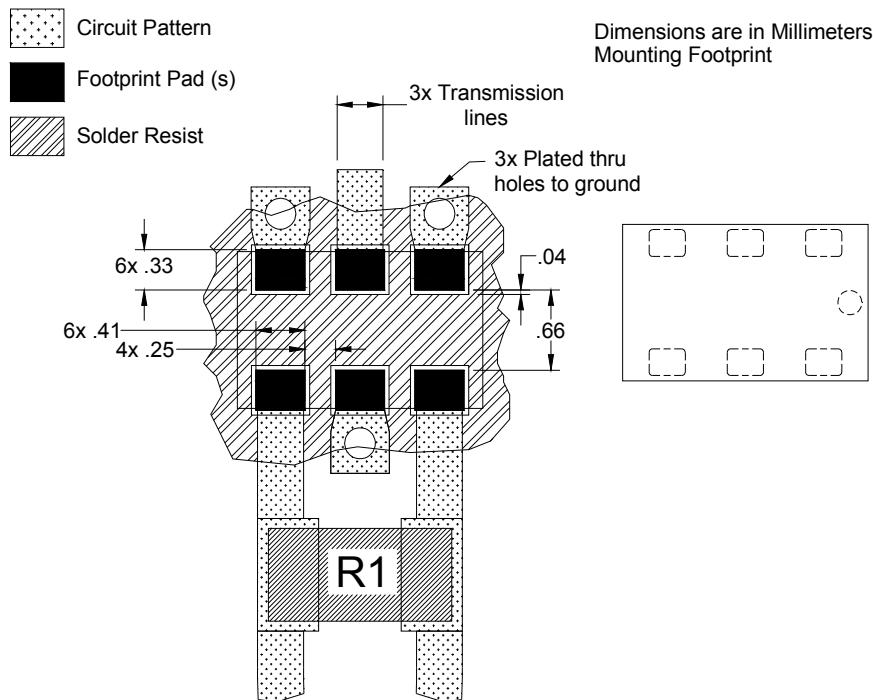

## **Mounting Configuration:**

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from organic PTFE based composites which possess excellent electrical and mechanical stability. Xinger components are compliant to a variety of ROHS and Green standards and ready for Pb-free soldering processes. Pads are Gold plated with a Nickel barrier.

An example of the PCB footprint used in the testing of these parts is shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances. In addition, since the PD0409J7575S2HF is a Wilkinson power divider, an external 0603 150Ω resistor must be mounted in locations R1 as shown in the Figure below.

### **Pad Footprint w/ 0603 Resistor Locations**

## Packaging and Ordering Information

Parts are available in reels and are packaged per EIA 481-2. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel. See Model Numbers below for further ordering information.
