Six-Element SMD Photodiode Array OPR2100, OPR2100T, OPR2100HS, OPR2100HST

Features:

- Six-PIN photodiode array
- High-temperature chip carrier
- Closely matched responsivity between elements
- · Choice of low or high speed
- Easily mountable in any configuration
- Suitable for harsh industrial operating conditions

Description:

Each OPR2100 device is a six-element photodiode that is designed to meet the needs of motor encoder applications. Designed specifically for industrial encoder applications, the OPR2100 features a high temperature SMD chip carrier, a temperature range and a low leakage current that can withstand extreme operating conditions.

These devices have an opaque chip carrier that encloses six individual chips, which are mounted on isolated cathode contacts to allow external connection in any desired configuration. The opaque polyimide package shields the photodiodes from stray light and can withstand multiple exposures to the most demanding soldering conditions, while the gold-plated wraparound solder pads provide exceptional storage and wetting characteristics.

See Application Bulletin 237 for handling instructions.

Applications:

- · Motor encoder applications
- Industrial encoder applications
