

# Praetorian® 4-Channel EMI Filter Array with ESD Protection

# CM1453-04CP

### Features

- Four channels of EMI filtering
- ±15kV ESD protection
- (IEC 61000-4-2, contact discharge)
- ±30kV ESD protection (HBM)
- Greater than -40dB of attenuation at 1GHz
- Chip Scale Package (CSP) with 0.40mm pitch and 0.25mm CSP solder ball which features extremely low parasitic inductance for optimum filter and ESD performance
- OptiGuard<sup>™</sup> Coating for improved reliability at assembly
- RoHS compliant

### Applications

- LCD and Camera data lines in mobile handsets
- I/O port protection for mobile handsets, notebook computers, PDAs etc.
- EMI filtering for data ports in cell phones, PDAs or notebook computers.
- Wireless handsets
- Handheld PCs/PDAs
- LCD and camera modules

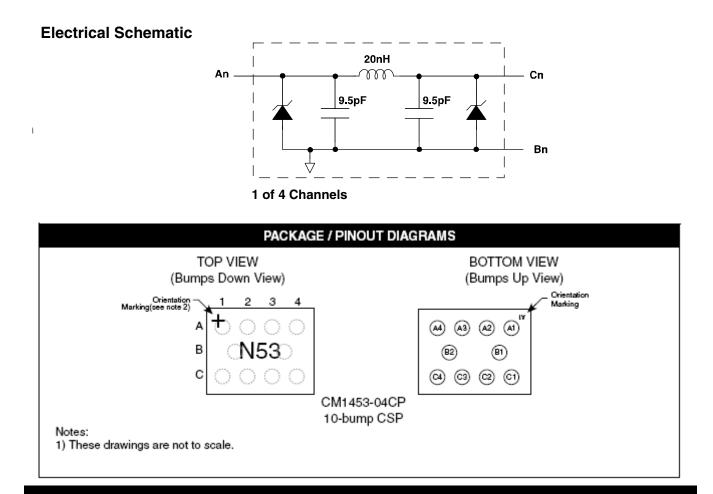

#### **Product Description**

The CM1453-04CP is a pi-style EMI filter array with ESD protection, which integrates filters (C-L-C) in CSP form factor with 0.40mm pitch. Each EMI filter channel of the CM1453-04CP is implemented as a 3pole L-C filter where the component values are 9.5pF-20nH-9.5pF. The roll-off frequency at -6dB attenuation is 380MHz and can be used in applications where the data rates are as high as 160Mbps while providing greater than -35dB over the 800MHz to 2.7GHz frequency range. The parts include ESD diodes on every I/O pin that provide a high level of protection against electrostatic discharge (ESD). The ESD protection diodes connected to the filter ports are designed and characterized to safely dissipate ESD strikes of ±15kV, beyond the maximum requirement of the IEC61000-4-2 international standard. Using the MIL-STD-883 (Method 3015) specification for Human Body Model (HBM) ESD, the pins are protected for contact discharges at greater than ±30kV.

This device is particularly well suited for wireless handsets, mobile LCD modules and PDAs because of its small package format and easy-to-use pin assignments. In particular, the CM1453-04CP is ideal for EMI filtering and protecting data and control lines for the LCD display and camera interface in mobile handsets.

The CM1453-04CP incorporates *OptiGuard*<sup>™</sup> which results in improved reliability at assembly. It is manufactured with a 0.40mm pitch and 0.25mm CSP solder ball to provide up to 28% board space savings vs. competing CSP devices with 0.50mm pitch and 0.30mm CSP solder ball.

### **Application Information**

Refer to Application Note AP-217, "The Chip Scale Package", for a detailed description of Chip Scale Packages offered by California Micro Devices. See <a href="http://www.wlcspforum.org/documents/pdf/ap-217.pdf">http://www.wlcspforum.org/documents/pdf/ap-217.pdf</a> for download.

### **Mechanical Specifications**

CM1453 devices are packaged in custom Chip Scale Packages (CSP). See Application Note AP-217 for more information at: <u>http://www.wlcspforum.org/documents/pdf/ap-217.pdf</u>.
