

# Quad, Wide Supply Range 3V~36V, Low Power 25 $\mu$ A/ch

## Rail-to-Rail Output Operational Amplifier

### ■ GENERAL DESCRIPTION

The NJM8524 is a Rail-to-Rail output quad operational amplifier that operates from a single supply of 3V to 36V, with low supply current 25 $\mu$ A/ch ( $V_{CC} = 5V$ ) and low offset voltage 1.8mV max.

Rail-to-Rail output can secure output dynamic range easily. An input common-mode voltage range that includes GND is suitable for single supply applications.
