3 - INPUT VIDEO SUPER IMPOSER WITH 75Ω DRIVER

■ GENERAL DESCRIPTION

NJM2264 is 3-input, 1-output video switch with 75Ω driver circuit. One input is provided with sink chip clamp function, which adjusts the DC level of video signal. The other two inputs of transistor open base can make control of luminance signal. This video switch can be connected to TV monitor directly, as it has 75Ω driver circuit internally.

NJM2264 is a high performance video switch which is operated with 5V supply voltage.
