# FREEDOM SW INVERTER/CHARGERS

#### POWERFUL. CONFIGURABLE. VERSATILE...

The NEW GENERATION Freedom SW series represents highly sophisticated and advanced inverter/ chargers available in 3000 W with 150 A charger and 2000 W with 100 A charger models. The second generation 2000 watt model has been completely redesigned to include many of the same great features found in its high power counterpart. A key feature enhancement is 'Generator Support Mode' which enables the Freedom SW to supplement a generator¹ when AC loads exceed the generator's capacity. The new generation models also feature improved AC transfer/AC input detection time, providing the ability to transfer AC loads to batteries in less than 10 milliseconds when the incoming grid or generator power is lost. Connected loads are almost unable to feel the power transition due to this quick transfer time. Both models are approved to UL458 with marine supplement, CSA, ABYC and FCC, Class B requirements.

### Parallel and Series Stacking - NEW FEATURE

- ▶ Parallel stacking enables the Freedom SW inverter/chargers to double the AC output in inverter mode
- ▶ Series stacking enables the Freedom SW inverter/chargers to generate 120/240 V split phase output²

#### Application

 Designed for a variety of mobile applications such as commercial, emergency and recreational vehicles, marine vessels, construction and military equipment.

#### **Product Features**

- Pure sine wave output to operate sensitive electronics
- ▶ Advanced configuration options for customized applications
- ▶ Built-in transfer switch automatically transfers between inverter power and incoming AC power
- Power factor corrected multi-stage charger for fast, efficient charging
- ▶ Temperature compensated charging for most climate conditions
- ▶ Ignition lockout feature helps to minimize unnecessary battery drain³
- Full inverter output up to 40°C (104°F) for 3000W model; 30°C (86°F) for 2000W model
- ▶ Conformal coated circuit boards for humid environments
- Dual input / Dual output AC interface for 3000 W model only
- Ability to charge batteries drained to extremely low voltage

#### **Protection Features**

- Battery over-voltage and under-voltage protection
- Over-temperature shutdown
- Automatic overload protection
- Short-circuit protection
- Integrated, resettable AC breakers

<sup>&</sup>lt;sup>3</sup> When used with On/Off Remote Panel sold separately

Certified to CSA Standard C22.2 No. 107.1 UL 458 with marine supplement FCC Class B

This product has undergone rigorous testing under extreme thermal & mechanical conditions
