

**Temperature measurement  
Accessories compression ferrule fitting  
CF-M-6-G1/4-A4**

- Compression ferrule fittings for direct mounting of temperature probes (TP series)
- Temperature range -50...350 °C

**General description**

Compression ferrule fittings are designed for direct compression fitting of probes. Various insertion depths of the probe can thus be achieved. When mounted with compression ferrule fittings, the probe has direct contact with the medium through which immediate reaction to temperature changes is achieved.

<b>Type code</b>	CF-M-6-G1/4-A4
Ident no.	9910483
<b>Temperature operating range</b>	-50...350 °C
<b>Pressure resistance</b>	100 bar
<b>Housing</b>	
Housing material	Stainless steel, V4A (1.4404)
Sealing material	stainless steel
Mechanical connection	G 1/4"
Pressure resistance	100 bar
Max. tightening torque housing nut	100 Nm
