FDT/DTM HART programming adapter
IM-PROG

The IM-PROG is used to parameterize TUR-CK devices with PACT*ware*™ via the serial interface of a PC.

For this purpose, the interface module to be parameterized is connected via the IM-PROG to the serial interface of the PC, using the included connection cable.

The interface device has to be powered for parameterization.

The IM-PROG converts the signal level and implements the galvanic isolation.

Additionally, the parameters can be stored on the PC or printed.

- **PC adapter for programming of TUR-CK-PACT*ware* devices**
- **Transfer of galvanically separated signals**

FDT/DTM HART programming adapter
IM-PROG

Type code	IM-PROG
Ident no.	6890422
Weight	116 g

Dimensions

ø 9 48 48 56 16
