IP67 junction box, 6-channel
JBBS-49SC-T615B/EX**

The 6-channel Ex junction box JBBS-49SC-T615B/EX is designed for FOUNDATION™ fieldbus systems.

The junction is equipped with an adjustable short-circuit limit. The following max. current limitations can be adjusted via a rotary switch: 30, 35, 45 and 60 mA.

The housing is made of powder-coated die-cast aluminium and features protection class IP67.

The junction box is equipped with a selectable bus terminating resistor. The according switch is integrated in the housing on the board.

Condensation in the housing is prevented by a breather.

The shield is capacitively coupled to the housing potential. A switch for direct coupling of the shield and housing is implemented.

Note: Sufficient equipotential bonding for the installation has to be provided. The device is connected to the equipotential bond via the housing's M5 x 1 grounding bolt.

- Entity and FISCO compliant according to IEC 60079-11
- Junction box for wall mounting with PVC cable glands M20 x 1.5
- Short-circuit protection per drop line/spur
- integrated terminating resistor (switch-in)
- cable shielding: capacitive or direct connection to housing potential selectable via switch
- isolated support terminal for optional protective conductor incorporated in cable
- powder-coated die-cast aluminium housing
- pressure compensation element for protection against condensation water
- connection of the housing potential via an M5 x 1 bolt
