 5 LEAD SOT-23-5 SINGLE GATE LOGIC PACKAGES

BUILD CUSTOM LOGIC MODULES

Model 36205 SURFBOARDS can support 2 SOT-23-5 SINGLE GATE Logic devices. Board footprints accept devices from Fairchild Semiconductor, Texas Instruments, and others. Any SOT-23-5 logic package sharing the same power and ground pin outs can be used. Install the devices of your choice to provide the desired functions. Great for prototype or short run production circuits. On board provision for mounting optional bypass capacitor is provided. Both devices share common power and ground connections allowing for the convenience of an 8 pin SIP package. Pins on .100 in. centers provide compatibility with breadboards and sockets. While sold as a bare module for user assembly, Capital can assemble with your specified parts if desired.
