- NOTES:**
- The temperature of the component (ambient plus temperature rise) must be within the specified operating temperature range.
 - Inductance tested at 100kHz, 10 mV_{RMS}
 - Inductance drop = 10% typical at the Saturation Current
 - $\Delta T = 15^\circ\text{C}$ rise typical at the Heating Current
 - The rated current is the lower of the saturation or heating current.
 - Optional Tape & Reel packaging can be ordered by adding a "T" suffix to the part no. (i.e. P0770.102NL becomes P0770.102NLT). Pulse complies to industry standard tape and reel specification EIA481.
 - The "NL" suffix indicates an RoHS-compliant part number. Non-NL suffixed parts are not necessarily RoHS compliant, but are electrically and mechanically equivalent to NL versions. If a part number does not have the "NL" suffix, but an RoHS compliant version is required, please contact Pulse for availability.
