

Pulse Part Number W7001

The W7001 is a small flexible Near Field Communication (NFC) antenna ideal for embedded products such as tablets, laptops, and payment terminal devices. It is intended for both secure payment or security access applications.

The W7001 is a thin, flexible antenna that can be fed with customer-supplied spring clips, contacts, direct-solder methods or with the use of Pulse’s own W9908/W9909 C-clips. Mounting the antenna is easily accomplished using the thin but aggressive holding adhesive backing. It is recommended for mounting on the inside of plastics covers or carriers embedded in the device.
