

9814 & 9852 SURFACE MOUNT REED RELAYS

9814 & 9852 Series Surface Mount Reed Relays

Ideally suited to the needs of Automated Test Equipment, Instrumentation and Telecommunications requirements, Coto's 9814 & 9852 Series is a miniature Surface Mount Reed Relay that combines small size with exceptional RF performance. The 9814 extends life at ATE loads 3X or more utilizing Coto's proprietary switch technology. The external Magnetic Shield reduces interaction between parts in high density boards. The 9852 adds Form C capability. Small size plus added features allow for high density packing, and make these relays ideal for designs such as high speed, high pin count VLSI testers where high speed, small size and high performance are all needed.

9814 & 9852 Series Features

- ▶ Available in Axial, Gull wing and "J" lead configurations
- ▶ Tape and Reel packaging available
- ▶ High reliability, hermetically sealed contacts for long life
