Description

Tripp Lite's B094-008-2E-M-F is the most advanced console / terminal server platform available today. In one secure appliance, it offers an in-band and out-of-band management solution for serial console ports, servers, virtual servers, service processors, UPS & PDU's, environmental monitoring and more. Supports 3G cellular out-of-band access. The USB port on the console server is compatible with the Pantech ULM290 VZW and the following Sierra Wireless USB modems; Compass 888, USB 598, USB 598U, USB 312U, USB 308, and U313. This 8 port console server management switch enables system administrators to securely access and control their data centers and networks from anywhere in the world. And this enterprise level unit is equipped with a built in modem, dual Ethernet NIC, 4GB internal USB flash, and runs on Linux for scalability and reduced downtime.

The B094-008-2E-M-F offers advanced software features that surpass the requirements of even the most demanding applications. These features include Network UPS Tools for UPS monitoring, PowerMan for integrated PDU and RPC functions with in session hotkey support, Pattern match alerting, Open access to the Linux shell for scripting, heartbeat monitoring with automatic fail-over, Cisco pinouts and much more. Made in the USA. Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases.
