## Model #: B054-001-USB

### KVM Switch Accessories - USB Server Interface Module for NetDirector Matrix KVM Switches

#### Highlights

- Needed to connect a USB Server to the B060-Series NetDirector Matrix KVM switch via Cat5e cable
- Easy to install; no software needed
- Allows a maximum distance of 500ft from KVM to Server via Cat5 cable
- Compact and lightweight design
- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

#### Description

Tripp Lite's USB Server Interface Module connects to the HD15 port and USB port on a computer/server, and converts them to a single RJ45 connector. Ordinary Cat5e patch cables can then be used to connect the server to the switch ports on the Tripp Lite B060-Series NetDirector Matrix KVM switch. Use of Cat5e cables frees up space in the server cabinet that would be filled by traditional, thicker KVM cables.

#### System Requirements

- Server or CPU with a HD15 port and a USB port
- A B060-Series NetDirector Matrix KVM Switch
- Cat5e/6 cable; up to 500ft

#### Package Includes

- USB Server Interface Module

#### Features

- Eliminates the need for thicker, heavier KVM cables
- Compact, lightweight design
- Plug and Play; no software required
- No power supply required
- Allows a Server/CPU to be located up to 500ft away from the KVM switch
- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases
