Model #: U330-05M

5 meter (16-ft) USB3.0 Super Speed A/A Active Extension Cable (USB-A M/F)

Highlights

- Extend a USB 3.0 signal beyond the 5 meter USB distance limitation
- Full 5Gbps transmission

Description

Tripp Lite's 16-ft. USB 3.0 active extension cable is a bus powered extension cable that can be used to increase the length of a device cable without the worry of signal loss and potential performance problems. USB limits a cable's length to 16ft. Any length above 16 feet requires the use of an active cable such as this one. This cable has a signal booster built in. The cable must be plugged directly into a USB port (either on the PC or a hub). Use a standard 6' 10' or 15' USB 3.0 A-B cable to reach the desired distance. The U330-05M provides up to 150mA of power to the connected device. If your device requires more than 150mA of power, an external power supply will be required. The U330-05M accepts a 5V, 2A power supply with a 3.5 x 1.75mm DC jack.

System Requirements

- A USB 3.0 Computer port and USB 3.0 device are required to meet USB 3.0 speeds. A USB 2.0 port or device can be used, but you will be limited to the speeds of that port / device.
- The U330-05M provides up to 150mA of power to the connected device. If your device requires more than 150mA of power, an external power supply will be required. The U330-05M accepts a 5V, 2A power supply with a 3.5 x 1.75mm DC jack.

Package Includes

- 5 meter (16-ft) USB3.0 Super Speed A/A Active Extension Cable (USB-A M/F)

Features

- Extend a USB 3.0 signal passed the 16 ft. (5 m.) distance limitation
- Works together with standard USB 3.0 cables
- Provides up to 150mA of power to the connected device. If your device requires more than 150mA of power, an external power supply will be required.
- Accepts a 5V, 2A power supply with a 3.5 x 1.75mm DC jack.
- Backward compatible to previous USB generations

Specifications

OVERVIEW	
Intended Application	Connecting USB Peripherals
