Subminiature Basic Switch

## Ultra Slim Snap-action Switch with 2.7 mm in depth

- Excellent electrical characteristics and snap action mechanism in spite of its ultra small size.
- Ideal for applications where size is extremely limited and high reliability is demanded.

## RoHS Compliant

## Model Number Legend

| D2MQ-1 123 |  |
| :---: | :---: |
| 1. Actuator | 3. Terminals |
| None: Pin plunger | None: PCB terminals (Straight) |
| L : Leaf lever | -TL : PCB Terminals (Left-angled) |
| 2. Switching capacity | -TR : PCB Terminals (Right-angled) |
| None: 30 VDC 0.5A |  |
| -105:30 VDC 50mA |  |

<Hinge lever>

| D2MQ-1 2-1 3 |  |  |
| :---: | :---: | :---: |
| 1. Actuator |  | 3. Terminals |
| 4L: Hinge lever |  | None: PCB terminals (Straight) |
| 2. Ratings | - | -L : PCB Terminals (Left-angled) |
| None: 30 VDC 0.5A |  | -R : PCB Terminals (Right-angled) |

-105:30 VDC 50mA

## List of Models

| Actuator | Ratings Terminals * | 0.5 A |  |  | 50 mA |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Straight terminals | Left-angled terminals * $\square$ | Right angled terminals * | Straight terminals $\square$ | Left-angled terminals * | Right angled terminals |
| Pin plunger | $\bigcirc$ | D2MQ-1 | D2MQ-1-TL | D2MQ-1-TR | D2MQ-1-105 | - | - |
| Leaf lever |  | D2MQ-1L | D2MQ-1L-TL | D2MQ-1L-TR | D2MQ-1L-105 | - | - |
| Hinge lever | - | D2MQ-4L-1 | D2MQ-4L-1-L | D2MQ-4L-1-R | D2MQ-4L-105-1 | D2MQ-4L-105-1-L | D2MQ-4L-105-1-R |

The terminal shape drawings indicate the shape when
the Switch is viewed from the direction of the arrow in the drawing below.

## Contact Form

## -SPDT

Contact Specifications

| Item | Model | 0.5 A models | 50 mA models |
| :--- | :--- | :---: | :---: |
| Contact | Specification | Rivet |  |
|  | Material | Silver plated | Gold plated |
|  | Gap <br> (standard value) | 0.15 mm |  |
| Minimum applicable load <br> (see note) | 5 VDC 50 mA | 5 VDC 5 mA |  |

## Ratings

| Rated voltageType <br> Item | 0.5 A models |  | Resistive load models |
| :---: | ---: | :---: | :---: |
|  | 0.5 A | 50 mA |  |

Note. The above rating values apply under the following test conditions.
(1) Ambient temperature: $20 \pm 2^{\circ} \mathrm{C}$
(2) Ambient humidity: $65 \pm 5 \%$
(3) Operating frequency: 30 operations $/$ min

## Characteristics

| Permissible operating speed |  | 0.1 mm to $0.5 \mathrm{~mm} / \mathrm{s}$ (for pin plunger models) |
| :---: | :---: | :---: |
| Permissible operating frequency | Mechanical | 60 operations/min |
|  | Electrical | 30 operations/min |
| Insulation resistance |  | $100 \mathrm{M} \Omega \mathrm{min}$. (at 250 VDC with insulation tester) |
| Contact resistance (initial value) |  | $100 \mathrm{~m} \Omega$ max. |
| Dielectric strength | Between terminals of the same polarity | 500 VAC 50/60 Hz 1 min |
|  | Between current-carrying metal parts and ground | 500 VAC 50/60 Hz 1 min |
| Vibration resistance * 1 | Malfunction | 10 to $55 \mathrm{~Hz}, 1.5 \mathrm{~mm}$ double amplitude |
| Shock resistance | Durability | 1,000 m/s² \{approx. 100G\} max. |
|  | Malfunction * 1 | $300 \mathrm{~m} / \mathrm{s}^{2}$ \{approx. 30G\} max. |
| Durability * 2 | Mechanical | 30,000 operations min. (60 operations/min) |
|  | Electrical | 10,000 operations min. (30 operations/min) |
| Degree of protection |  | IEC IP40 |
| Ambient operating temperature |  | $-15^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$ (at ambient humidity of 60\% max.) <br> (with no icing or condensation) |
| Ambient operating humidity |  | $35 \%$ to $85 \%$ (for $+5^{\circ} \mathrm{C}$ to $+35^{\circ} \mathrm{C}$ ) |
| Weight |  | Approx. 0.3 g |

Note. The data given above are initial values.
*1. For the pin plunger models, the above values apply for use at the free position and total travel position. For the lever models, they apply at the total travel position. Close or open circuit of the contact is 1 ms max.
*2. For testing conditions, consult your OMRON sales representative.

$\left.\begin{array}{|ll|c|}\hline \text { Operating Force } & \text { OF Max. } & 0.39 \mathrm{~N}\{40 \mathrm{gf}\} \\ \text { Releasing Force } & \text { RF } & \text { Min. }\end{array}\right) 0.04 \mathrm{~N}\{4 \mathrm{gf}\}$

* Plastic lever

Note 1. Unless otherwise specified, a tolerance of $\pm 0.15 \mathrm{~mm}$ applies to all dimensions.
Note 2. The operating characteristics are for operation in the A direction ( ).

## Precautions

太Please refer to "Basic Switches Common Precautions" for correct use.
Cautions

## OSoldering

- Terminal connections

When soldering terminals manually, perform soldering within 3 seconds at iron tip temperature no higher than $300^{\circ} \mathrm{C}$. Do not apply any external force for 1 minute after soldering. When applying solder, keep the solder away from the case of the Switch and do not allow solder or flux to flow into the case. It is recommended that you apply flux guard to the mounting surface of the Switch.

## Correct Use

## -Mounting

Use M1.4 mounting screw with plane washers or spring washers to securely mount the Switch. Tighten the screws to a torque of 0.08 to $0.1 \mathrm{~N} \cdot \mathrm{~m}\{0.8$ to $1 \mathrm{kgf} \cdot \mathrm{cm}\}$.

## -Operation

- Do not apply a force more than two times the rated operating force to the actuator and leaf lever.
- Provide an amount of OT that equals or exceeds the standard.
- Do not change the operating position by modifying the actuator.
- Do not use the Switch in an application where the operating speed is extremely slow or the actuator is set in the midpoint between the free position and operating position.
- Mount the pin plunger so that the operating force is applied in perpendicular alignment with the stroke of the actuator.
- Do not apply a shock to the actuator, otherwise, the Switch may be damaged.
- Do not apply excessive force to the actuator of the Leaf Lever Switch in the operating, releasing, and horizontal directions.
