

# The Big Deal

- Hand Formable
- Tight Bend Radius
- Excellent Return Loss and Insertion Loss

## **Product Overview**

The 141 Series Hand-Flex Coaxial Cables are ideal for interconnection of coaxial components or sub-systems. The construction includes a silver-plated copper-clad steel center conductor which maintains the shape after bending. The outer shield is copper braid, tin soaked, which minimizes signal leakage and at the same time flexible for easy bend. Dielectric is low loss PTFE. Connectors have passivated stainless-steel coupling nut over a gold plated connector body and Silver Plated Copper Clad Steel.

# **Key Features**

Feature	Advantages			
Hand-Formable RF Cables	The 141 Series Hand-Flex cables are hand formable making them ideal for use integrating coaxial components and sub-assemblies without the need for special cable-bending tools and alleviating the risk of damage during the bending process typical of semi-rigid coaxial cable assemblies.			
Tight Bend Radius	Capable of only 8mm bend radius, the 141 Hand Flex series is able to make connections in tight spaces making these cables ideal for dense system integration			
Excellent Return loss	Supporting typical return loss of 30 dB to 6 GHz and 21 dB to 18 GHz, the 141 Series Hand-Flex Cables are ideally suited for interconnecting a wide variety of RF components while minimizing VSWR ripple contribution due to mating cables & connectors.			
Good Power Handling Capability: • 546W at 0.5 GHz • 90W at 18 GHz	Mini-Circuits 141 Cable series can support medium to high RF power levels enabling these cables to be used in the transmit path. NOTE: power rating is at sea-level altitudes.			
Built in Anti-torque nut	Mini-Circuits 141 Series Hand Flex cables include an anti-torque feature to support the connector body during installation alleviating risk of stress to the connector/cable interface.			
Jacketed and Unjacketed options	Standard 141 Series cables include a blue FEP insulator jacket reducing the risk of accidental shorting of DC power lines or active pins during installation and operation. Un-jacketed versions are available upon request.

#### DC to 18 GHz **50**Ω 5 inch

## **Maximum Ratings**

-55°C to 105°C				
-55°C to 105°C				
546W at 0.5 GHz				
387W at 1 GHz				
273W at 2 GHz				
156W at 6 GHz				
121W at 10 GHz				
90W at 18 GHz				

Permanent damage may occur if any of these limits are exceeded.

#### Features Wideband frequency coverage, DC to 18 GHz

- Low Loss, 0.36 dB at 18 GHz
- Excellent Return Loss, 25 dB at 18 GHz · Hand formable to almost any custom shape without
- special bending tools
- · 8mm bend radius for tight installations · Anti-torque nut prevents cable stress during installation
- Insulated outer jacket standard<sup>1</sup>
- Connector interface, meets MIL-STD-348

### Applications

- Replacement for custom bent 0.141" semi-rigid cables
- · Communication receivers and transmitters
- Military and aerospace system
- · Environmental and test chambers
