

Handheld Self-Powered Wireless Light Switch

E3T-S2HWH (White) E3T-S2HBK (Black)
E3T-S2HSL (Silver)

ILLUMRA™ self-powered light switches use no wires or batteries. Pressing the switch provides the energy needed to transmit a wireless signal that controls lights or other devices connected to ILLUMRA receivers.

The Handheld Self-Powered Wireless Light Switch is small enough to fit in the palm of your hand – keep it in your pocket, on a table, or leave it in your car to turn on lights as you pull up to a house or building.

Easy-To-Use

- Easy-to-configure
- Communicates with ILLUMRA receivers
- Maintenance-free for 20+ years

Reliable Range

- 50-150 foot range (typical)
- Unique ID of each switch activates only the intended receiver(s)

Save Energy and Money

Save energy and money by creating Manual ON / Auto OFF controls using ILLUMRA switches and occupancy sensors or by programming all lights to respond to a single master switch. ILLUMRA makes it easy to keep lights and systems off when not in use!

Simple Wireless Control

- Control lights, motors, or other electric loads
- Use in single pole, 3-way, or 4-way switch applications
- No batteries, charging or external power required

Control The Way You Want It

- Handheld switch makes control portable
- One switch can control unlimited receivers within range
- Experience wireless dimming control or rocker, toggle, or momentary switch functionality
- Maintenance free for 20+ years
