2 Representative samples of the product were subjected to the conditioning described in IPC/JEDEC J-STD-020D and passed electrical testing, package coplanarity and visual inspection which revealed no external cracks or changes in package body flatness.

3 I_{DC} is the value at which the inductance falls to 80% of its nominal value or when its temperature reaches 40°C, whichever is sooner.

4 I_{SAT} is the value at which the inductance falls to 80% of its nominal value.
