

Parrot® ASTEROID Tablet

Apps, navigation, music and Bluetooth® hands-free

The Parrot ASTEROID Tablet is a Multi-touch, hands-free calling and multimedia system that seamlessly integrates with an existing audio system. Utilize the advanced features of your Smartphone and also enjoy a variety of driving assistance applications including Navigation, Points Of Interest, Music On Demand, Information and Web radio. Access all your music sources and advanced hands-free features by using the large Multi-touch display or wireless remote control.

Useful Apps

Discover and download connected Apps from the Google Play store or the ASTEROID Market including Navigation, Driving Assistance, Points Of Interest, Music On Demand and Web Radio.

The best of Bluetooth® hands-free calling

Automatically synchronize your entire phonebook, initiate calls using advanced voice recognition, and simultaneously manage calls on two different phones.

Voice-activated music search

Push the dedicated button, say an artist or an album name and enjoy your music.

Connect to the world

Access the Internet through a compatible Smartphone using a 3G/4G USB dongle or Wi-Fi®. Works with all Smartphone operating systems including Android™, iOS, RIM, Symbian® and Bada.

The largest variety of music connectivity

Access all your music from your iPod®/ iPhone®, USB, SD card, Bluetooth®, line-in and also directly from music Apps.

Simple and innovative design

This user-friendly system contains simple control options accessible through the ASTEROID Tablet's 5" Multi-touch capacitive display or optimized wireless remote control.
