

iCON Isolating Signal Conditioners

IMO

- Ultra-slim Housing
- Full Isolation
- Fast response time
- High Accuracy
- AC/DC supply
- Loop Powered (option)

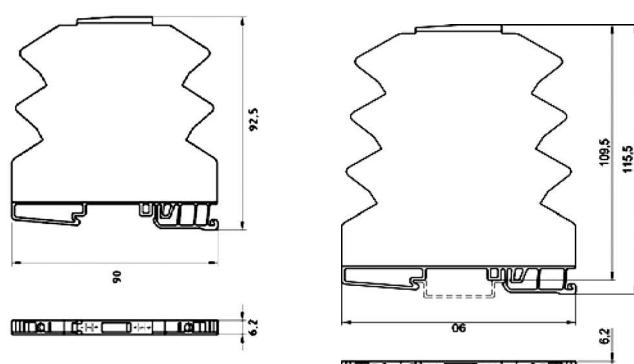

The iCON family of Isolating Signal Conditioners features a unique design which enables a wide range of input signals to be accurately isolated and converted. The ultra slim 6.2mm case design provides minimum rail occupancy whilst the circuit design allows units to be mounted without air gap ensuring reliable and efficient operation.

Full 3-port isolation (powered models) up to 1.5kV enables usage in the most harsh of electrical environments and guarantees protection from ground loops and voltage surges. The iCON family can be powered with either 24Vdc or ac and has a low current consumption making it simple and low cost to install.

To further lower the time and cost of installation, the iCON family is available with either Screw or Spring Clamp terminals.
