

FORWARD REGULATOR (Multi-Pellet) DIODES

These high speed multi-pellet diodes are used in computer circuits and general purpose applications. They consist of one, two, three, or four silicon diode chips in series, mounted in a DO-35 hermetically sealed glass package. This structure makes possible devices having controlled conductance and low leakage. This controlled conductance is necessary for the design of clippers, dc coupling circuits, clamping circuits, meter protectors, bias regulators, and other types of circuits that require tight tolerance on low voltage levels.

ELECTRICAL CHARACTERISTICS @ 25°C unless otherwise stated

Part Number	Minimum Breakdown Voltage, BVR at 5uA, Volts	Forward Voltage	Maximum Reverse Current			Maximum Capacitance* at 0 Volts f = 1 MHz, pF	Stored Charge	
			at 25°C nA	at 150°C uA	at Volts		Min pC	Max pC

DESIGN DATA

CASE: Hermetically sealed, glass case DO-35 Outline

LEAD MATERIAL: Copper clad steel

LEAD FINISH: Tin/Lead

POLARITY: Diode to be operated with the banded (cathode) end positive with respect to the opposite end

WEIGHT: 0.2 Grams

MOUNTING POSITION: Any
