

Model Number

10-****X

Features

- Industrial standard housing Ø58 mm
- Up to 5000 ppr
- Servo flange, square flange or clamping flange
- Special flanges with special shafts on demand
- Stainless steel version
- 10 V ... 30 V with RS 422 interface

Description

Practical applications have shown again and again that standards are useful and beneficial. There are always applications, however, in which the desired result cannot be obtained with a standard incremental rotary encoder.

Even the mechanical interface varies quite often in accordance with the overall conditions of the application, as is shown by an example:

If you intend to use the incremental rotary encoder with a measurement wheel, we recommend a shaft diameter of 10 mm. Standardisation prescribes a clamping flange in this case. This will be useful in most cases, but not in all.

Series 10 allows you to create individual combinations of specific features. In this way, the shaft with a diameter of 10 mm from the example can also be combined with a square flange.

Normally, the housing of an incremental rotary encoder is manufactured from an aluminium cold extrusion part. For series 10, the housing is produced from a zinc pressure diecast. This gives an extra level of sturdiness to the incremental rotary encoder. If a pressure diecast housing is not sufficient, the housing and flange can also be manufactured from stainless steel.

Up to a limit of 1500 pulses, the pulse disk is designed using plastic. In addition, pulse disks are also manufactured from glass.

These properties make series 10 the most versatile of our incremental rotary encoders with a diameter of 58 mm.

Technical data

General specifications

Pulse count max. 5000

Electrical specifications

Operating voltage U_B 10 ... 30 V DC

No-load supply current I_0 max. 150 mA

Output

Output type RS 422, incremental

Load current max. per channel 20 mA, conditionally short-circuit proof, reverse polarity protected

Output frequency max. 100 kHz

Rise time 100 ns

De-energized delay t_{off} 100 ns

Connection

Connector type 42306 (M16), 6-pin

type 42308 (M16), 8-pin

type 9414 (M16), 5-pin

type 9416 (M23), 12-pin

Cable Ø6 mm, 4 x 2 x 0.14 mm², 2 m

Standard conformity

Degree of protection DIN EN 60529, IP65

Climatic testing DIN EN 60068-2-3, no moisture condensation

Emitted interference EN 61000-6-4:2007/A1:2011

Noise immunity EN 61000-6-2:2005

Ambient conditions

Operating temperature

Glass disk -20 ... 70 °C (-4 ... 158 °F)

Plastic disk -20 ... 60 °C (-4 ... 140 °F)

Storage temperature

Glass disk -40 ... 70 °C (-40 ... 158 °F)

Plastic disk -40 ... 60 °C (-40 ... 140 °F)

Mechanical specifications

Material

Combination 1 housing: diecast zinc
flange: aluminum 3.1645
shaft: stainless steel 1.4305 / AISI 303

Combination 2 (Inox) housing: stainless steel
flange: stainless steel
shaft: stainless steel

Mass approx. 335 g (combination 1)
approx. 1400 g (combination 2)

Rotational speed max. 10000 min⁻¹

Moment of inertia ≤ 30 gcm²

Starting torque ≤ 1.5 Ncm

Shaft load

Axial 60 N

Radial 80 N

Approvals and certificates

UL approval cULus Listed, General Purpose, Class 2 Power Source

Dimensions

Signal outputs

At the encoder version with output switching 1 and signal output 3 (see order code) the zero signal is inverted.
