### Super-mini Signal Conditioners Mini-M Series

# **CT TRANSMITTER**

(RMS sensing)

#### **Functions & Features**

• Converts alternating current from a current transformer

- into a standard process signal
- Minimum ripple

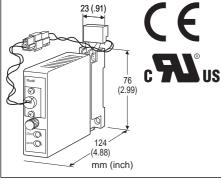

• Rerouted input signal does not pass through the base socket in order to protect it from melting caused by rush current of a motor

- CT Protector provided for open-circuit protection
- CE marking
- UL approval

#### **Typical Applications**

• Centralized monitoring and control of motors, pumps or heaters by DCS

Monitoring power line and power supply current
