NOTES

- 1. All measurements should be made directly at the terminals of the power supply
- 2. All specifications typical @ 25°C, unless otherwise noted, at nominal line and load.
- 3. Ripple and noise dependent upon output voltage as specified per particular model.
- 4. Isolation for up to 1 minute duration.
- 5. Specified for free air convection cooling.
- 6. Minimum load is not required for proper operation.
- Load Regulation is measured by change ±40% of measured output load from 60% full load, with the other output set to 60% full load.
- 8. Line Regulation measured from 90-264VAC. 100VAC minimum required for full load start.
- 9. Preset Accuracy measured at nominal load, 120VAC input.
- 10. O/P Noise measured directly at the pins/terminals at nominal load, 0.1uF bypass and 47uF electrolytic, pk-pk @ 20MHz bandwidth.
