

**Applications**

- Isolation Switch for Input Power or Battery Application
- High Side Switch for Inverter Applications

**Features and Benefits**

- Environmentally Friendly Product
- RoHS Compliant Containing no Lead, no Bromide and no Halogen
- Common-Drain P-Channel MOSFETs Provides High Level of Integration and Very Low RDS(on)

**Description**

The IRF9383MTRPbF combines the latest HEXFET® P-Channel Power MOSFET Silicon technology with the advanced DirectFET® packaging to achieve the lowest on-state resistance in a package that has the footprint of a SO-8 and only 0.6 mm profile. The DirectFET® package is compatible with existing layout geometries used in power applications, PCB assembly equipment and vapor phase, infra-red or convection soldering techniques, when application note AN-1035 is followed regarding the manufacturing methods and processes. The DirectFET package allows dual sided cooling to maximize thermal transfer in power systems, improving previous best thermal resistance by 80%.
