

General purpose input/output rail-to-rail low power operational amplifiers

Datasheet — production data

Features

- Operating range V_{CC} = 2.5 V to 6 V
- Rail-to-rail input and output
- Extended V_{icm} ($V_{DD} - 0.2$ V to $V_{CC} + 0.2$ V)
- Capable of driving a 32 Ω load resistor
- High stability: 500 pF
- Available in SOT23-5 micropackage, SO-8, SO-14, TSSOP8, TSSOP14, and MiniSO-8 package
- Operating temperature range: -40 °C, +125 °C

Applications

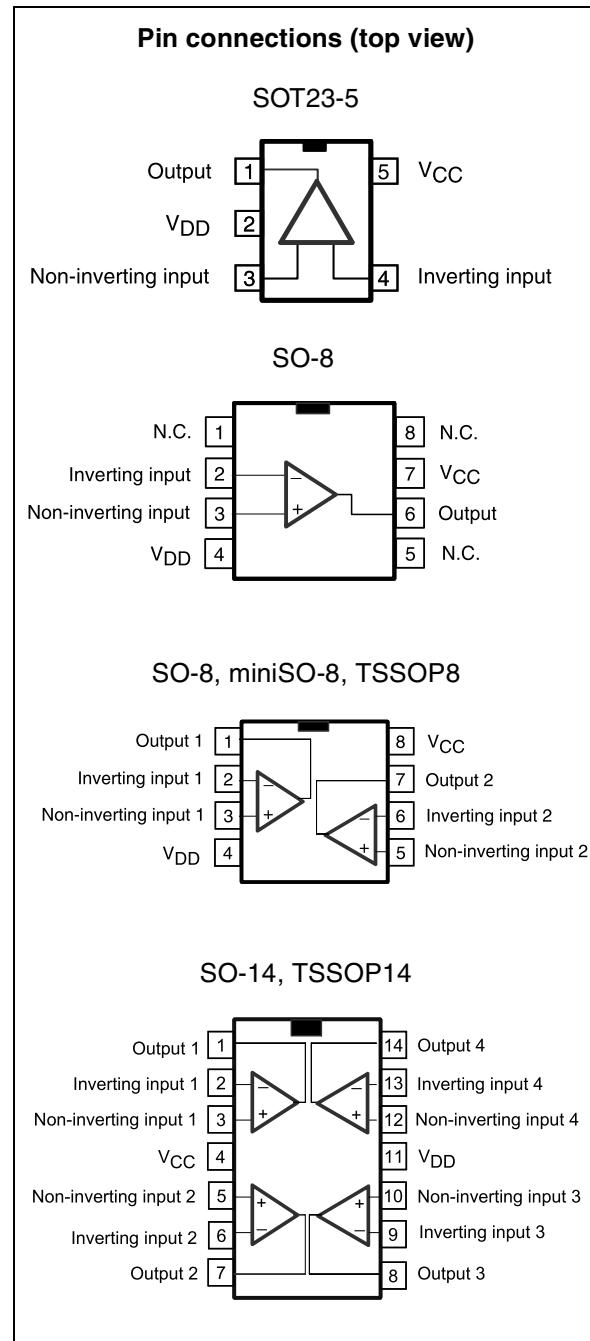

- Battery powered applications
- Audio driver (headphone driver)
- Sensor signal conditioning
- Laptop/notebook computers

Description

The TSV358 and TSV324 (dual and quad) devices are low voltage versions of the LM358 and LM324 commodity operational amplifiers. The TSV321 device is the single version. The TSV321/358/324 devices are able to operate with voltages as low as 2.5 V and feature both I/O rail-to-rail.

The common mode input voltage extends 200 mV beyond the supply voltages at 25 °C while the output voltage swing is within 100 mV of each rail with a 600 Ω load resistor. At $V_{CC} = 3$ V, these devices offer 1.3 MHz of gain bandwidth product and provide high output current capability with a typical value of 80 mA.

These features make the TSV3xx family ideal for active filters, general purpose low voltage applications, and general purpose portable devices.

1 Absolute maximum ratings and operating conditions

Table 1. Absolute maximum ratings

Symbol	Parameter	Value	Unit
V_{CC}	Supply voltage ⁽¹⁾	7	V
V_{id}	Differential input voltage ⁽²⁾	± 1	V
V_{in}	Input voltage	$V_{DD} -0.3$ to $V_{CC} +0.3$	V
T_{stg}	Storage temperature	-65 to +150	°C
T_j	Maximum junction temperature	150	°C
R_{thja}	Thermal resistance junction-to-ambient ⁽³⁾ SOT23-5 SO-8 SO-14 TSSOP8 TSSOP14 MiniSO-8	250 125 105 120 100 190	°C/W
R_{thjc}	Thermal resistance junction-to-case ⁽³⁾ SOT23-5 SO-8 SO-14 TSSOP8 TSSOP14 MiniSO-8	81 40 31 37 32 39	°C/W
ESD	HBM: human body model ⁽⁴⁾	2	kV
	MM: machine model ⁽⁵⁾	200	V
	CDM: charged device model ⁽⁶⁾	1.5	kV
	Latch-up immunity	200	mA
	Lead temperature (soldering, 10 s)	250	°C
	Output short-circuit duration	See ⁽⁷⁾	

1. All voltages values, except differential voltage are with respect to network terminal.
2. Differential voltages are the non-inverting input terminal with respect to the inverting input terminal. If $V_{id} > \pm 1$ V, the maximum input current must not exceed ± 1 mA. When $V_{id} > \pm 1$ V, an input series resistor must be added to limit input current.
3. Short-circuits can cause excessive heating and destructive dissipation. R_{th} are typical values.
4. Human body model: 100 pF discharged through a 1.5 kΩ resistor between two pins of the device, done for all couples of pin combinations with other pins floating.
5. Machine model: a 200 pF capacitor is charged to the specified voltage, then discharged directly between two pins of the device with no external series resistor (internal resistor $< 5 \Omega$), done for all couples of pin combinations with other pins floating.
6. Charged device model: all pins plus package are charged together to the specified voltage and then discharged directly to ground.
7. Short-circuits from the output to V_{CC} can cause excessive heating. The maximum output current is approximately 80 mA, independent of the magnitude of V_{CC} . Destructive dissipation can result from simultaneous short-circuits on all amplifiers.

Table 2. Operating conditions

Symbol	Parameter	Value	Unit
V_{CC}	Supply voltage	2.5 to 6	V
V_{icm}	Common mode input voltage range $T_{amb} = 25 \text{ }^{\circ}\text{C}, 2.5 \leq V_{CC} \leq 6 \text{ V}$ $T_{min} < T_{amb} < T_{max}, 2.5 \leq V_{CC} \leq 5.5 \text{ V}$	$V_{DD} - 0.2$ to $V_{CC} + 0.2$ V_{DD} to V_{CC}	V
T_{oper}	Operating free air temperature range	-40 to + 125	$^{\circ}\text{C}$

2 Electrical characteristics

Table 3. Electrical characteristics at $V_{CC} = +3\text{ V}$, $V_{DD} = 0\text{ V}$, R_L , C_L connected to $V_{CC}/2$, and $T_{amb} = 25^\circ\text{C}$ (unless otherwise specified)

Symbol	Parameter	Test conditions	Min.	Typ.	Max.	Unit

5 Revision history

Table 11. Document revision history

Date	Revision	Changes
2-Aug-2005	1	First release - Products in full production.
20-Sep-2005	2	Addition of TSV321A/TSV324A/TSV358A data in tables in Section 2: Electrical characteristics on page 4 . Minor formatting and grammatical changes.
7-Dec-2005	3	Missing PPAP references inserted see Section 4: Ordering information on page 15 .
28-Jun-2007	4	Correction made on output drive capability, 80mA in description on cover page. SVR measurement conditions inserted in electrical characteristics tables. Offset voltage limit in temperature added in Section 2: Electrical characteristics on page 4 . Correction made on Input Bias Current typical value in Section 2: Electrical characteristics on page 4 . Captions of electrical characteristics figures updated. Automotive grade order codes added to Section 4: Ordering information on page 15 .
21-Feb-2008	5	Corrected SO-14 R_{thja} value to 105 °C/W. Updated presentation of package information. Corrected footnote for automotive grade order codes in order code table.
13-Sep-2012	6	Updated Features (added SO-8, SO-14, TSSOP8, TSSOP14, and MiniSO-8 package). Updated “Pin connection” figure on page 1 (removed part numbers). Removed TSV321ID, TSV321AID, TSV321IYDT, TSV358ID, TSV358AID, TSV324ID, TSV324AID, TSV321IYD, TSV358IYD, TSV358AIYD, TSV321IYD, TSV324IYD, and TSV324AIYD order code from Table 10 . Qualified status of TSV324AIYPT, TSV324IYPT, TSV324IYDT, TSV324AIYDT, TSV358IYDT, TSV321RIYLT, TSV321RAIYLT, and TSV358AIYDT order code in Table 10 . Updated ECOPACK text in Section 3 . Minor corrections throughout document.
