

DATA SHEET

SMV1705 Hyperabrupt Tuning Varactors Supplied on Film Frame and Waffle Packs

Applications

- Wide bandwidth VCOs
- VHF and UHF TV tuners
- Analog phase shifters

Features

- Designed for high volume, low-cost battery applications
- Low series resistance
- High capacitance ratio
- Available as:
 - Full wafer on film frame (SMV1705-099)
 - Dice in waffle packs (SMV1705-000)
- Small footprint chip size: 12 x 12 x 5.5 mils

Description

Skyworks SMV1705 varactors are silicon hyperabrupt junction varactor diodes specifically designed for battery operation. These devices have a high capacitance ratio and low series resistance, which makes them appropriate for low phase noise Voltage Controlled Oscillators (VCOs) operating at wireless frequencies of 2.5 GHz and higher.

The SMV1705-099 is supplied as 100 percent electrically tested, fully singulated wafers mounted on a film frame. The SMV1705-000 is supplied as a 100 percent electrically tested die in waffle packs.

The absolute maximum ratings of the SMV1705 varactors are provided in Table 1. Electrical specifications are specified in Table 2. Typical performance characteristics are provided in Figures 1 and 2. The SPICE model for the SMV1705 die is shown in Figure 3 and the associated model parameters are provided in Table 3. Die mechanical characteristics are listed in Table 4.

NEW

Skyworks Green™ products are RoHS (Restriction of Hazardous Substances)-compliant, conform to the EIA/EICTA/JEITA Joint Industry Guide (JIG) Level A guidelines, are halogen free according to IEC-61249-2-21, and contain <1,000 ppm antimony trioxide in polymeric materials.

Table 1. SMV1705-000/-099 Absolute Maximum Ratings

Parameter	Symbol	Minimum	Typical	Maximum	Units
Power dissipation (@ cathode temperature of 25 °C)	P _{DIS}			250	mW
Reverse voltage	V _R			12	V
Forward current	I _F			20	mA
Junction temperature	T _J	-55		+150	°C
Storage temperature	T _{STG}	-55		+150	°C

Note: Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

CAUTION: Although this device is designed to be as robust as possible, Electrostatic Discharge (ESD) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions should be used at all times.

Table 2. SMV1705-000/-099 Electrical Specifications (Note 1) (Note 2)
(Cathode Temperature = 25 °C, Unless Otherwise Noted)

Parameter	Symbol	Test Condition	Min	Typical	Max	Units
Reverse breakdown voltage	V _{BR}	I _R = 10 μA	12			V
Reverse leakage current	I _R	V _R = 8 V			20	nA
Junction capacitance	C _{J1}	V _R = 1 V, f = 1 MHz	17.3	18.3	19.3	pF
	C _{J4}	V _R = 4 V, f = 1 MHz	5.3	6.1	6.6	pF
Capacitance ratio	C _{J1} /C _{J4}		2.8	3.0		-
Series resistance	R _S	V _R = 1 V, f = 470 MHz		0.32		Ω

Note 1: Performance is guaranteed only under the conditions listed in this Table and is not guaranteed over the full operating or storage temperature ranges. Operation at elevated temperatures may reduce reliability of the device.

Note 2: The SMV1705-000 and SMV1705-099 are 100% tested for junction capacitance, capacitance ratio, reverse leakage current, and breakdown voltage. Electrical rejects of the SMV1705-099 devices (singulated wafer on film frame) are identified with black ink.

Table 3. SPICE Model Parameters

Part Number	C _{J0} (pF)	V _J (V)	M	C _P (pF)	R _S (Ω)	L _S (nH)
SMV1705-000	31	3	2	0	0.32	0.15
SMV1705-099	31	3	2	0	0.32	0.15

Table 4. SMV1705 Die Characteristics

Part Number	Typical Quantity of Good Dice Per Wafer	Chip Size		Chip Thickness		Typical Anode Contact Diameter	
		(in)	(mm)	(in)	(mm)	(in)	(mm)
SMV1705-000	N/A	0.012 x 0.012	0.3048 x 0.3048	0.0055 ± 0.0005	0.1397 ± 0.0127	0.00675	0.17145
SMV1705-099	60,000	0.012 x 0.012	0.3048 x 0.3048	0.0055 ± 0.0005	0.1397 ± 0.0127	0.00675	0.17145

Package Outline Drawings

Table 4 identifies the die part numbers with their corresponding quantity per wafer and chip measurements. The package outline die drawing for the SMV1705-000 (dice in wafer packs) is shown

in Figure 4. The package outline die drawing for the SMV1705-099 (full wafer on film frame) is shown in Figure 5.

The SMV1705-000 is supplied in quantities of 100 pieces per wafer pack.
