

**FEATURES:**

- Low Profile DIP14 case
- 1.5KVDC Isolation
- Pin-out compatible with DCP01 Series
- Short circuit protection
- Operating Temperature: -40°C to +85°C
- High Power Density
- RoHS Compliant

**Models**

**Single output**

| Model         | Input Voltage (V) | Output Voltage (V) | Output Current max (mA) | Isolation (VDC) | Efficiency (%) |
|---------------|-------------------|--------------------|-------------------------|-----------------|----------------|
| AM1M-0505S-NZ | 4.5-5.5           | 5                  | 200                     | 1500            | 74             |
| AM1M-0509S-NZ | 4.5-5.5           | 9                  | 111                     | 1500            | 78             |
| AM1M-0512S-NZ | 4.5-5.5           | 12                 | 83                      | 1500            | 77             |
| AM1M-0515S-NZ | 4.5-5.5           | 15                 | 67                      | 1500            | 76             |
| AM1M-1205S-NZ | 10.8-13.2         | 5                  | 200                     | 1500            | 73             |
| AM1M-1209S-NZ | 10.8-13.2         | 9                  | 111                     | 1500            | 74             |
| AM1M-1212S-NZ | 10.8-13.2         | 12                 | 83                      | 1500            | 76             |
| AM1M-1215S-NZ | 10.8-13.2         | 15                 | 67                      | 1500            | 75             |

NOTE: All specifications in this datasheet are measured at an ambient temperature of 25°C, humidity<75%, nominal input voltage and at rated output load unless otherwise specified.

**Input Specifications**

| Parameters    | Nominal | Typical              | Maximum | Units |
|---------------|---------|----------------------|---------|-------|
| Voltage range | 5<br>12 | 4.5-5.5<br>10.8-13.2 |         | VDC   |

**Isolation Specifications**

| Parameters         | Conditions | Typical | Rated | Units |
|--------------------|------------|---------|-------|-------|
| Tested I/O voltage | 60 Sec     |         | 1500  | VDC   |
| Resistance         | 500Vdc     | 1000    |       | MOhm  |

**Output Specifications**

| Parameters                       | Conditions                    | Typical                      | Maximum | Units    |
|----------------------------------|-------------------------------|------------------------------|---------|----------|
| Voltage accuracy                 |                               | See tolerance envelope graph |         |          |
| Short Circuit protection         |                               | Continuous                   |         |          |
| Short circuit restart            |                               | Auto-Recovery                |         |          |
| Line voltage regulation (Single) | For Vin change of 1%          | ±1.2                         |         | % of Vin |
| Load voltage regulation (Single) | 10% to 100% load              | 12.8                         |         | %        |
| Temperature coefficient          | Nominal input, 100% full load | 0.03                         |         | %/°C     |
| Ripple & Noise                   | 20MHz Bandwidth               | 75                           |         | mV p-p   |
| Minimum Load Current             |                               | 10                           |         | % of Max |

NOTE: It is not recommended to have the outputs connected in parallel

### General Specifications

| Parameters                    | Conditions                     | Typical   | Maximum                | Units |
|-------------------------------|--------------------------------|---|------------------------|-------|
| Switching frequency           | 100% load                      | 100   |                        | KHz   |
| Operating temperature         |                                | -40 to + 85   |                        | °C    |
| Storage temperature           |                                | -55 to +125   |                        | °C    |
| Maximum case temperature      |                                |   | 100                    | °C    |
| Cooling                       | Free Air Convection            |   |                        |       |
| Humidity                      |                                |   | 95                     | % RH  |
| Case material                 | Epoxy Resin(UL94-V0)           |   |                        |       |
| Weight                        |                                | 1.4   |                        | g     |
| Dimensions (L x W x H)        |                                | 0.77 x 0.28 x 0.18 inches                                 | 19.50 x 6.60 x 4.50 mm |       |
| MTBF                          |                                | >1,500,000 hours (MIL-HDBK -217F, Ground Benign, t=+25°C) |                        |       |
| Maximum Soldering Temperature | 1.5mm from case for 10 seconds |   | 260                    | °C    |

### Pin Out Specifications

| Pin | Single |
|-----|--------|
| 1   | +Vin   |
| 2   | -Vin   |
| 5   | -Vout  |
| 6   | +Vout  |
| 7   | NC     |
| 8   | NC     |
| 14  | NC     |

NC: not connected

### Dimensions

### Typical Characteristics

### Minimum Load Requirement

In order for this module to operate efficiently and reliably a minimum load of no less than 10% of its maximum needs to be maintained at all times during operation.

NOTE: this converter should never be operated under no load. If it is required to operate the converter with less than 10% load it is recommended to install a resistor in parallel with the application load to draw additional current from the converter output to maintain the minimum load condition, or use a converter rated at a lower power.

### Recommended Filter Circuit

If it is required to decrease the input/output ripple, an “LC” filtering network may be connected to the input and output of the converter, see above.

It should be noted that the inductance and the resonant frequency of the “LC” filtering network should differ from the DC/DC converter switching frequency to avoid mutual interference.

The capacitance of the output filter capacitor must not exceed the values in the Table below to avoid startup problems and ensure safe and reliable operation.

It's not recommended to connect any external capacitor in the application field when output loading is less than 0.5 watt.

### External Capacitor Tables

#### Input Capacitor (Cin)

| Vin (VDC) | Cin (uF) |
|-----------|----------|
| 5         | 4.7      |
| 12        | 2.2      |

#### Output Capacitor (Cout)

| Vout (VDC) | Cout (uF) |
|------------|-----------|
| 5          | 10        |
| 9          | 4.7       |
| 12         | 2.2       |
| 15         | 1         |

**NOTE:** 1. Datasheets are updated as needed and as such, specifications are subject to change without notice. Once printed or downloaded, datasheets are no longer controlled by Aimtec; refer to [www.aimtec.com](http://www.aimtec.com) for the most current product specifications. 2. Product labels shown, including safety agency certifications on labels, may vary based on the date manufactured. 3. Mechanical drawings and specifications are for reference only. 4. All specifications are measured at an ambient temperature of 25°C, humidity<75%, nominal input voltage and at rated output load unless otherwise specified. 5. Aimtec may not have conducted destructive testing or chemical analysis on all internal components and chemicals at the time of publishing this document. CAS numbers and other limited information are considered proprietary and may not be available for release. 6. This product is not designed for use in critical life support systems, equipment used in hazardous environments, nuclear control systems or other such applications which necessitate specific safety and regulatory standards other the ones listed in this datasheet. 7. Warranty is in accordance with Aimtec's standard Terms of Sale available at [www.aimtec.com](http://www.aimtec.com).
