

Cable Ties inside serrated

• T-Series

Features and Benefits

Available in a wide range of materials, these cable ties all feature internal serrations allowing for a positive hold onto cable, hose and pipe bundles. The design of the head guarantees a high tensile strength whilst allowing a very low insertion force, this, combined with the bent tail design of many of the ties, ensures a simple and quick installation. Whilst easily installed by hand, manual and pneumatic (for high volume applications) tensioning tools are available to ensure a consistent and safe installation.

Application

For the routing, bundling and securing of cables, pipes and hoses.

T Series for bundling and securing of cables for a wide range of applications, available in various colours and materials.

Cable Ties for higher chemical resistance for temperatures up to +150°C in Ethylentetrafluorineethylen

- T-Series in E/TFE

For more information on E/TFE sockets please refer to KR-Series on page 169.

Material Data	
Material	Ethylentetrafluorineethylen - E/TFE (Tefzel®)
Operating Temperature	-80 °C to +150 °C continuous
Flammability	UL94 V0

Tefzel® is a registered trademark of DuPont.
General linguistic usage for cable ties made from raw material E/TFE is Tefzel-Tie. In addition to Tefzel from DuPont HellermannTyton is also using equivalent E/TFE raw material from other suppliers.
