

POLYFUSE® Resettable PTCs

Radial Leaded > 16R Series

ROHS MHF 16R Series

Description

Littelfuse 16R Series Radial Leaded PTCs are designed to provide resettable overcurrent protection serving a wide range of electronics applications. With maximum 16 volts and maximum 100-ampere short circuit rating, they offer an ideal solution for USB protection.

Features

- 100A short circuit rating
- 16V Operating voltages
- Fast time-to-trip
- Meets all USB protection requirements
- RoHS compliant, Lead-Free and Halogen-Free*

Applications

- Computers & peripherals
- Any USB application
- General Electronics

Electrical Characteristics

E183209

R50119318

I bold = Hold current: maximum current device will pass without tripping in 23°C still air.

Caution: Operation beyond the specified rating may result in damage and possible arcing

I $_{\rm trip}$ = Trip current: minimum current at which the device will trip in 23°C still air.

 V_{max} = Maximum voltage device can withstand without damage at rated current (I_{max})

I may = Maximum fault current device can withstand without damage at rated voltage (Vmay)

P_d = Power dissipated from device when in the tripped state at 23°C still air.

R min = Minimum resistance of device in initial (un-soldered) state.

R _{1max} = Maximum resistance of device at 23°C measured one hour after tripping.

^{*} Effective January 1, 2010, all 16R PTC products will be manufactured Halogen Free (HF). Existing Non-Halogen Free 16R PTC products may continue to be sold, until supplies are depleted.

Average Time Current Curves

The average time current curves and Temperature Rerating curve performance is affected by a number or variables, and these curves provided as guidance only. Customer must verify the performance in their application.

Temperature Rerating Curve

POLYFUSE® Resettable PTCs Radial Leaded > 16R Series

Soldering Parameters - Wave Soldering

| Pre-Heating Zone | Refer to the condition recommended by the flux manufacturer. Max. ramping rate should not exceed 4°C/Sec. |
|------------------|--|
| Soldering Zone | Max. solder temperature should not exceed 260°C |
| Cooling Zone | Cooling by natural convection in air. |

Physical Specifications

| Lead Material | 2.5A: Tin-plated Copper clad Steel |
|------------------------------|--|
| Leau Materiai | 3.0 - 14.0A: Tin-plated Copper |
| Soldering Characteristics | Solderability per MIL-STD-202, Method 208E |
| Insulating Material | Cured, flame retardant epoxy polymer meets UL94V-0 requirements. |
| Device Labeling | Marked with 'LF', voltage, current rating, and date code. |

Environmental Specifications

| Operating/Storage Temperature | -40°C to +85°C |
|--|--|
| Maximum Device Surface Temperature in Tripped State | 125°C |
| Passive Aging | +85°C, 1000 hours -/+ 5% typical resistance change |
| Humidity Aging | +85°C, 85% R.H., 1000 hours -/+ 5% typical resistance change |
| Thermal Shock | +85°C to -40°C 10 times -/+ 5% typical resistance change |
| Solvent Resistance | MIL-STD-202, Method 215F No change |
| Moisture Resistance Level | Level 1, J-STD-020C |
